Ryse Technologies

YOUR STRATEGIC MICROSOFT PARTNER FOR AI-POWERED BUSINESS SOLUTIONS

Performance Scout.

Diagnose & Optimize Your Dynamics 365 Performance

When Dynamics 365 performance lags, it doesn't just frustrate users—it slows down your entire business. Bottlenecks, failed integrations, or hidden errors can derail projects and stall productivity. Performance Scout gives you a clear, detailed diagnosis of what's wrong and how to fix it—fast.

Unlike trial-and-error troubleshooting, Performance Scout pinpoints exactly where issues occur, so you can resolve them quickly and restore confidence in your system.

About Performance Scout

Performance Scout is a specialized diagnostic tool for Dynamics 365 environments that uncovers hidden performance issues and provides actionable recommendations. Whether you're troubleshooting a production slowdown or trying to get a stalled implementation back on track, Performance Scout gives your team the insights needed to act decisively.

Key Product Features

Deep Environment Diagnostics
Analyze transactions, integrations, custom code, and configurations for performance bottlenecks.

Actionable Recommendations
Receive clear next steps and prioritized fixes to address issues efficiently.

Rapid Deployment
Lightweight setup that gets you results in days, not weeks.

Comprehensive Reporting
Detailed findings you can share with technical teams, leadership, or external partners.

Expert Support
Backed by Ryse Technologies' senior-level Dynamics 365 experts who help interpret and implement results.

How it works

1 INSTALL & CONFIGURE
Deploy Performance Scout to your Dynamics 365 environment with minimal disruption.

2 RUN DIAGNOSTIC SCAN
The tool analyzes system performance, integrations, and key workflows.

3 GENERATE REPORTS & INSIGHTS
Receive prioritized findings with supporting details for root cause analysis.

4 ACT ON RECOMMENDATIONS
Work with your team—or Ryse experts—to resolve issues and validate improvements.

Supported Scenarios

- **STALLED IMPLEMENATIONS**
  Identify what's preventing your project from moving forward.
- **PRODUCTION ISSUES**
  Pinpoint root causes of slowdowns, crashes, or transaction failures.
- **MIGRATION PREPARATION**
  Ensure a clean, stable environment before moving to the cloud.
- **ONGOING HEALTH CHECKS**
  Monitor and maintain system performance over time.

Compatibility & Requirements

- Compatible with Microsoft Dynamics 365 Finance & Operations and Dynamics 365 Customer Engagement.
- Supports both on-premises and cloud deployments.
- Requires secure access to your Dynamics 365 environment.

Benefits

GET BACK ON TRACK FAST
Quickly resolve issues that slow down projects or daily operations.

REDUCE RISK
Identify problems before they escalate into costly failures.

BOOST USER CONFIDENCE
Deliver reliable performance that keeps users productive.

SAVE TIME & RESOURCES
End guesswork and focus efforts where they matter most.

SUPPORT GROWTH
A stable, optimized environment scales with your business needs.

Why Choose Performance Scout

PROVEN EXPERTISE
Developed by Ryse Technologies, specialists in solving complex Dynamics 365 challenges.

INDEPENDENT PERSPECTIVE
Get unbiased, data-driven insights into your environment.

FUTURE-READY
Use insights to prevent future problems and support ongoing growth.
